Re: AHERA 3-Year Reinspection

eric@farmerenv.com
Designated Person training?

Dear Ms. Sheridan:

Your school's most recent Asbestos 3-Year Reinspection has been completed as required. Two copies of the Report are being presented to the school for inclusion in your Asbestos Management Plan. One copy is to stay at the school main office and the other copy is to remain in the Superintendent's Office.

- The materials were found to be in good condition throughout the building. Continue to monitor the materials under Operations & Maintenance and report any change in condition immediately.

Upon completion of the Reinspection, the following action items were noted:

- New materials were identified throughout the school buildings that have been recorded in this 3 Year Reinspection report as newly "assumed" asbestos containing materials. These materials even though they are not original building materials are to be sampled prior to any disturbance.
- All materials that are to be impacted in any manner, rather maintenance or renovation or daily use, need to be sampled prior to impacting. *Can be fined \$1000 for every violation. Since 1980's*
- Training records were missing from the Management Plan for employees, custodial + maintenance 1/yr. *Eric*
- Six Month Surveillance records were missing from the Management Plan. *2 yr, Farmer \$250, any consultant*
properly trained person 2x yr + do a walk through
winter will send a form, starting in feb.

Reminders:

Please make sure that the required asbestos annual notification has been distributed to all building occupants regarding the availability of the Asbestos Management Plan. A copy of the Notification is required to be on file in the Asbestos Management Plan.

Please make sure that all outside contractors are signing the required work permits before completing work in the building.

As always, thank you for your cooperation in regards to your asbestos program. If we can be of any further assistance, please do not hesitate in contacting me at 618-656-6988 or wynter@farmerenv.com.

Respectfully submitted,

Wynter Farmer
