CARBONDALE NEW SCHOOL
1302 E. PLEASANT HIL
CARBONDALE IL 62901

Dear Administrator:

RE: Three-Year Reinspection

The Illinois Department of Public Health has received the "School Information Form" for the AHERA three-year reinspection of the above-referenced school.

The three-year reinspection report should be incorporated into the school's copy of the asbestos management plan. During on-site AHERA compliance inspections conducted by the United States Environmental Protection Agency (U.S. EPA) and Illinois Department of Public Health personnel, the plan will be reviewed for the required materials. If any item is found to be missing or deficient the school could receive a letter of non-compliance from this department and the U.S. EPA.

Thank you for your compliance, if you have any questions, please contact Kent Cook or Cinda Noak at the Division of Environmental Health, Asbestos Program, 525 West Jefferson Street, Springfield, IL 62761 or telephone 217/782-3517, for the hearing impaired only (TTY# 800/547-0466).

Sincerely,

G. Michael Brandt, Chief
Asbestos & Lead Abatement Section

RE: Required three year asbestos reinspection

Dear Administrator:

In accordance with the Asbestos Hazard Emergency Response Act (AHERA), every three years each Local Educational Agency (LEA) shall conduct a reinspection of all friable and nonfriable known or assumed asbestos-containing building materials (ACBM) in each school building that they lease, own or otherwise use as a school building.

Each inspection shall be conducted by an Illinois Department of Public Health (IDPH) licensed Inspector and the results of the reinspection shall be reviewed by an IDPH licensed Management Planner. The Inspector and the Management Planner shall possess current certificates of training.

The Management Planner shall recommend, in writing, the appropriate response actions and sign and date the recommendation. The inspection report, written assessment and management planner's recommendation shall be submitted to the school's designated person for inclusion in the management plan within 30 days of the reinspection. All licensed Inspectors and Management Planners have been sent the instructions for conducting and completing three year reinspections (see attached).

All original inspection reports, management plans, and three year reinspection reports shall be on file at the school building. A complete review of these documents will be conducted during AHERA compliance inspections by United States Environmental Protection Agency (U.S. EPA) and Illinois Department of Public Health personnel.

Our records indicate that a reinspection will be required for your school. Enclosed is a school information form. **Section I** contains information that the Department has on file for your school building. Please check this information for accuracy. **Please complete Section II for your school building and Section III if there are any changes in the status of the school building since the last three-year reinspection. If the school building is considered to be asbestos free since the last three year reinspection, please submit written verification. If the facility has went through an asbestos removal project and all asbestos-containing materials, both friable and non-friable have been removed, have the project designer submit the verification.**

In order to enable us to update our records, please submit the completed school information form **within 30 days from the reinspection date** to the Illinois Department of Public Health, Asbestos Abatement Program, 525 West Jefferson Street, Springfield, IL 62761. **Do not send the three year reinspection reports to the Department, only the enclosed school information form should be submitted.**

If you have any questions, please contact R. Kent Cook or Cinda Noak at (217)782-3517 or for the hearing impaired only TTY# 800-547-0466.

Sincerely,

G. Michael Brandt, Chief
Asbestos and Lead Abatement Section

Enclosures: School information form
Memo to Inspectors and Management Planners

- 7) Ensure that the management plans are available for inspection and notification of such availability has been provided as specified in the management plan.
- 8) Keep a copy of the plan in each school and district administrative office. Management plans shall be available for inspection by workers before work begins in any area of a school building. The management plans shall be available during normal business office hours, without cost or restriction, for inspection by representatives of the USEPA, the Department, teachers, other school personnel, parents and the general public. The LEA may charge a reasonable cost to make copies of management plans.
- 9) Maintain records as part of the management plan.
- 10) Ensure that each management plan contains a statement, signed by the individual designated by the LEA, which certifies that the LEA responsibilities have been met or will be met.
- 11) **Ensure that three year reinspections are conducted in accordance with this Part and Section 855.310 (m).**
- 12) **Ensure that the three year school reinspection information form provided by the Department is submitted to the Department within 30 days from the reinspection.**

Section 855.310

Procedures for School Inspections and Reinspections

m) The following shall be required for reinspections:

- 1) All items included in Section 855 Appendix B, Illustration H.
- 2) Any additional suspect ACBM found during the reinspection, that was not included in the original management plan or previous reinspection report, shall be sampled according to procedures in Section 855.310(d) or listed as assumed ACBM and added to the management plan.
- 3) Inspections shall be conducted only during non-school hours when students or school personnel are not present. Samples shall not be collected in areas when and where students or school personnel are present.
- 4) Within 30 days after the reinspection, the Department-licensed inspector shall submit to the LEA the following:
 - A) The date of the reinspection.
 - B) The name and signature of the Department-licensed inspector performing the reinspection and the licensed management planner.
 - C) The current Department-issued license number of the inspector/management planner and the current training course certificate at the time of the inspection.
 - D) Any changes in condition of known or assumed ACBM.
 - E) Any changes in the classification of an assumed ACBM to a non-ACBM shall be performed in accordance with the requirements of this Section.
 - F) If the LEA chooses to resample known ACBM, the results of the new sampling shall use TEM to prove that the material is not ACBM.
 - G) Any changes in the response action recommendations.

a) Each LEA shall:

- 1) Ensure that any persons who perform inspections and reinspections, develop and update management plans, develop and implement response actions, including operations and maintenance or repair, are licensed in accordance with Section 855.100.
- 2) Ensure that all custodial and maintenance employees are properly trained as required by the Asbestos Hazard Emergency Response Act (AHERA), the Asbestos Abatement Act, and this Part.
- 3) Ensure that parents, teachers, and employee organizations are notified in writing at least once each school year of inspections, response actions, and post-response action activities, including periodic reinspection and surveillance activities that are planned or in progress. The LEA shall include in the management plan a description of the steps taken to notify such organizations and a dated copy of the notification.
- 4) The LEA shall designate a person to oversee all management plan activities and ensure that the designated person receives adequate training to perform the assigned duties of the local education agency. Such training shall include:
 - A) Health effects of asbestos.
 - B) Detection, identification and assessment of ACBM.
 - C) Options for controlling ACBM.
 - D) Asbestos management programs.
 - E) Relevant Federal and State regulations concerning asbestos including those of the Occupational Safety and Health Administration, U.S. Department of Labor, the U.S. Department of Transportation, the U.S. Environmental Protection Agency and the Department.
- 5) Ensure that short-term workers (e.g., telephone repair workers, utility workers, or exterminators) who may come in contact with asbestos in a school are provided information regarding the locations of asbestos-containing building materials (ACBM) and/or assumed ACBM.
- 6) Ensure that warning labels are posted in accordance with the following:
 - A) The LEA shall attach a warning label immediately adjacent to any ACBM and suspected ACBM assumed to be ACBM located in a routine maintenance area (such as boiler rooms) at each school building.
 - B) All labels shall be prominently displayed in readily visible locations and shall remain posted until the ACBM is removed.
 - C) The warning label shall state in print which is readily visible: Caution; Asbestos. Hazardous. Do Not Disturb Without Proper Training and Equipment.
