Re: Three-year reinspection of asbestos containing materials and assumed asbestos containing materials

Dear Ms. Rohling:

On May 30, 2001, David J. Roth conducted the required three-year AHERA reinspection of Carbondale New School. The inspection included all *friable and non-friable, assumed and tested*, ACM in all buildings of the school. Licenses for the inspector and management planner are attached.

The following items are noted:

1. No homogeneous areas of **friable, assumed or known**, asbestos containing materials were identified in this school.
2. The homogeneous areas of **non-friable, assumed or known**, asbestos containing materials have not become more friable since the 1998 reinspection.
3. All materials listed as asbestos containing or assumed to contain asbestos shall remain in the Operations and Maintenance Program until removed.

If you have any questions, please call me at 1.800.659.3329. Thank you.

Sincerely,

MEAD Environmental Associates, Inc.

David J. Roth
Inspector/Management Planner
