

Good evening

This week, we are working on genetics and heredity in science. I have some fun activities planned where we will work with Punnett Squares. We will have a test on Friday over the west and southwest states- Alaska, Hawaii, Montana, Wyoming, Washington, Oregon, California, Arizona, New Mexico, Idaho, Colorado, Texas, Nevada, Oklahoma, and Utah.

We are close to finishing Holes. When we have finished the book, we will watch the movie in class. We may do that Friday morning, following the social studies test. Friday afternoon, we have a field trip to Morris Library to learn about the 3D printer. I can only take three students in my car, so if you are able to drive, please let me know. We are scheduled to meet with Jennifer Horton at 1:30 and we should be finished in roughly an hour. It looks like we will need help transporting five students, so if you are available, we could definitely use help!

Progress reports were put in mailboxes last week. If you have questions about those or anything else, please don't hesitate to contact me.

Here's to a great upcoming week! Heather
