We learned all about the life cycle of a butterfly this week! We worked on addition and number matching skills by playing a domino game and made some awesome caterpillar patterns. We also wrote in our journals about where we would like to fly if we were butterflies! We ended the week by making a butterfly life cycle necklace.

Focus Question - What do you know about the life cycle of a butterfly?

Next week we will be talking about all things plants! We will do some more practice with patterns and work on addition using a number line. We will label the parts of a flower and talk about what plants need in order to grow. We will end the week by planting vegetables in our garden out back!

Focus Question - What do plants need in order to grow?

I hope everyone can make it out to Locally Grown tomorrow! It will be from 3-7 at Turley park. There are a lot of fun activities planned.

Enjoy your weekend!
